SERVICE BRIEF

Printer Management for SMBs

Reduce your Printing Costs and Gain Control over Company Printer Maintenance, Ink/Paper Usage and Document Security

Stop Losing Money on Your Printers

Reduce your printing cost, increase your efficiency, improve your document security, and reduce your carbon footprint.

Do you know the total cost of printing in your organization? Do you have the experience and knowledge to control your print spending? 40 East Tech's dedicated printer management will help reduce your printing cost and increase your efficiency by letting us handle the printing and letting you focus on your business.

Save and Recover Print Costs

Improve your bottom line with the 40 East Tech Print Management Solution

40 East Tech's Print Management solution is built to optimize your print infrastructure so you can easily identify savings opportunities. By managing your print system we are able to enforce rules for color output or duplex printing consistently and automatically save costs by establishing permission-based access to systems and printer features.

Keep Your Documents Safe

Prevent sensitive data from being exposed or stolen

40 East Tech's Print Management solution employs user authentication to ensure the security of every printer. Through user authentication we are able to create an audit trail so you'll be able to see who prints what

document when and on which device. Strengthen the security of your printing with 40 East Tech's print management solution.

Improve your Bottom Line by Going Green

Reduce your company's paper waste and carbon footprint

A print management solution can help reduce your company's paper waste by enforcing different rules that make sure that your company is only printing what is necessary and is not overprinting. By using a print management solution you will be able to enforce duplex printing, which will reduce your paper usage considerably. Support your company's sustainability efforts with 40 East Tech's Print Management solution.
